

LOWER JOHN DAY BASIN CURRENT & FUTURE WATER NEEDS REPORT

PUBLIC REVIEW & COMMENTS NEEDED

The Lower John Day Working Group Place Based Planning group has drafted the Step 3 Report: *Quantifying Existing and Future Water Needs and Demands*. We are now in the public review phase of this effort and are asking the community to give us their thoughts and comments on the draft report. This is a locally led, voluntary, and non-regulatory water resource planning effort. Become a part of the process and have your voice heard by providing your input.

To submit comments and for questions, contact:
